Reliable data that scales as you scale.

You're in luck.

Do you need assistance designing and deploying a control system tailored to your exact needs? Do you wish to enter the era of predictive and prescriptive maintenance? Does the idea of having reliable data for both individual equipment and for groups of equipment get you excited? We've got you covered.

Turn to RED Group for R&D and conceptual design. Manufacturers who sell or lease products in need of controls/SCADA are seeing what success looks like. They've been deploying RED Alert to monitor performance, warranty, reliability, location, and status of all equipment.

If you currently have a product with another PLC, RED Alert seamlessly integrates into your existing system/SCADA. RED Alert hardware and the cloud-based, hosted, SCADA system can be utilized independent of the other and can scale with your business. Bolt on the RED Alert platform to get the most out of your data.

So what's the ROI, you may be thinking.

You will have a trusted and proven control system that will provide access to information to help with:

Removing overhead operation cost by implanting remote monitoring and controls

Tracking assets to aid in workflow

Asset management

Decreasing unscheduled repairs and downtime

Planning intake, repairs and delivery of leased equipment

Reliability and operational data for product improvement and marketing purposes

RED Alert gives you extreme efficiency resulting in lower costs. You will now have the data you need to maximize your business. Think of the possibilities. RED Group will work with you to develop the best strategy based on your needs. The SCADA system is 70% built out of the box and 30% customized, allowing us to meet every need you have. We have tremendous engineering and integration experience with these types of assets and can help you achieve success, while maintaining the proper cybersecurity posture.

But what really makes RED Alert one of the best solutions out there is the ability to interface with other systems at a much lower cost.

At RED Group, we have an unwavering commitment to quality control, fit for purpose design, and impeccable support. We go the extra mile in testing all deployments of RED Alert before rolling them out, so our clients can trust that they'll work **24/7/365.**
